ABOUT ME

I'm a front-end developer with nearly seven years of experience. I have mainly worked on Scrum-managed projects and actively joined all ceremonies. My projects have varied – from starting with a browser extension to my latest work on a startup focused on forms.

I follow guidelines, contribute to feature discussions, and understand the importance of accessibility – apps should be easy to use and provide a clear UX, consistent experience for everyone.

I'm a team player with experience in large teams, code reviews, and collaborating with QA and designers. I've also handled projects alone in senior roles, confidently estimating the scope of work and delivering results. I often present demos, communicate with customers, and have experience interviewing and mentoring newcomers. I regularly learn through Udemy and welcome new ideas for problem solving. Outside work, I'm learning Italian for personal growth.

SKILLS

- JavaScript/ES6, TypeScript
- HTML5/CSS3
- React, Redux, Redux Toolkit
- Next.js
- Thunk, Saga
- Formik, React Hook Form
- JQuery
- Bootstrap, Tailwind
- MaterialUI, Storybook
- Accessibility
- Jira, Confluence
- Git, GitHub, GitLab
- Agile, Scrum, Kanban

WORK EXPERIENCE

SoftServe - Lviv, Ukraine (2017-2024)

- Verint - US client

Application for creating and designing surveys to capture, analyse, and act according to their feedback.

Tools and Technologies: React, Redux, Thunk, TypeScript, Tailwind, Material UI, Git, GitHub;

Duration: 26 months;

Responsibilities: Implementing new functionality, updating and refactoring the existing code, code reviews and discussions, individual tasks estimation;

Team size: 3-5 team members.

- BlackBerry - US client

A platform designed to protect secret corporate data from illegal actions for a corporation - a screenshot of a sensitive file, uploading them to an external resource, and so on.

Tools and Technologies: React, Redux, Saga, TypeScript, Material UI, Git, GitLab;

Duration: 11 months;

Responsibilities: Implementing new functionality, updating and refactoring the existing code, code reviews, accessibility, individual tasks estimation;

Team size: 5-7 team members.

- **Teladoc - US client**

This service provides care across numerous clinical specialties to help people resolve their primary care health needs.

Tools and Technologies: React, Redux, Redux Toolkit, Bootstrap, SCSS, Git, GitHub;

Duration: 4 months;

Responsibilities: Implementing new functionality, updating and refactoring the existing code, code reviews, unit tests, individual tasks estimation;

Team size: 5-7 team members.

- **Fake News Radar - SoftServe R&D Department**

Development of an analytical system that can detect and prevent the spread of misinformation based on tweets.

Tools and Technologies: NodeJS, React, Next.js, Webpack, Bootstrap, SCSS, Git, GitHub;

Duration: 2 months;

Responsibilities: Implementing new functionality, updating and refactoring the existing code;

Team size: 6-7 team members.

- **Semafone - GB client**

Set of microservices (17+) to generate secure payment links and to process sensitive data collection and payment execution. The solution is PCI DSS compliant which added complexity in architecture design, flows, business logic. The solution consists of microservices (Java) with REST APIs designed to use plain old XML over HTTP, SQL databases, ActiveMQ queues, WAF, AAA, and a web services (User facing UI and Configuration Portal to manage customers).

Tools and Technologies: JavaScript, Bootstrap, jQuery, Postman;

Duration: 5 months;

Responsibilities: fixing bugs, implementing new functionality, accessibility, code reviews, individual tasks estimation;

Team size: 7-10 team members.

- **RetailMeNot- US client**

Browser Extension where users can test all coupon codes to find the best one and receive the best discount. The extension also provides free merchants gifts and the possibility to receive free shipping.

Tools and Technologies: JavaScript, Bootstrap, jQuery, Postman;

Duration: 26 months;

Responsibilities: implementing new functionality, fixing bugs, code reviews, individual tasks estimation, mentoring new team members;

Team size: 15-20 team members.

EDUCATION

M. Sc. Degree in Chemistry

Ivan Franko National University of L'viv, Faculty of Chemistry

SoftServe IT Academy

“Development, design and architecture of modern software systems based on object-oriented languages” training course.
